

Hi Mr Prime Minister,

I lived in BC for two years 45 years ago when Whistler was known as Alta lake. That does not make me a Canadian, however. No matter.

I'll be as brief as poss.

Is your country in a mess, or is it in the edge of the abyss?

Whichever, so - *LISTEN UP!*

Either you and your cabinet are part of the select group of recipients of the financially induced, alimentary tract implanted, solid gold, corporate elbows, or you and they are not.

Notwithstanding the above, I trust you and your cabinet are as well as can be expected, on account of the fact that you have no idea what you are doing to control this madman-made out-of-control monster pandemic.

It's not all your fault.

You are all being misguided by self-interested forces in the guise of the CDC and the WHO, both of which are the political glove puppets of Big PHARM, BIG MED & 'PHYLANTHROPIC' BIG BILL GATES

I have been tracking 'fake nooz' - the stuff that the donald and his gang of liars and thieves don't want people thinking about, or even knowing about.

You have a real idea what this covid conspiracy is doing to your business workings and to your population.

Apart from killing them, your 'control' methods are debillitating businesses, isolating families, in fact doing as good a job as ICE is doing on the Mexican border.

Remember the movie TOTAL RECALL v1 - if not then watch it. (I haven't seen v2.)

This planet is very, very slowly, turning into a prison planet for everyone controlled by BIG PHARMA AND PHYLANTHROPIC BIG BILL GATES.

Please study the links thoroughly as well as the attachments.

you will learn a lot about surviving this conspiracy virus, keeping your country open and functioning if you pay attention and forget what disinformation the CDC and WHO are filling your heads with.

In one of the links you will hear testimony from Dr Brownstein in which he was threatened with having his med licence revoked by the CDC if he did not withdraw his claims that his treatment can cure/stop/kill covid. Because the CDC know there is no cure.

(How they are so confident about that I don't want to know).

However they appear to be running 'a boat race'.

For the uninitiated, 'a boat race' is a gambling term in which the result of an event is known before the event takes place.

But as Presidente Donald Duck has conveniently demonstrated, Covid can strike as many times as it likes.

Funny old country the youessofhay - land of the free - I believe they claim

I have also condensed the H2O2 treatment into a simple, step-by-step procedure for the non-medically trained and the hygienically unaware. It is entitled **Kovid killah!**

How does that old saw go?

Cometh the hour, cometh the man! Who knows?

So ask yourself if you and your team are part of the old establishment line of maleable incompetents, liars and crooks, masquerading as political saviours, the like of which I have observed for all of my fifty years of political awareness. Or are you and your team indeed watershed persons with balls enough to do the right thing by your people and make The Bobo and The Donald look like the pathetic, lying clowns they don't need to aspire to be?

Should you be the latter, are you going to explain to the business/retail /services world that it is not incumbent upon them to ensure the safety of those working, or entering their premises, by them having to shell out for masks, disinfectant, handwash, safety curtains, social distancing enforcers then limiting public access to their premises.

This isn't Russia or China or even the youessofhay!

Instead it is incumbent on everyone to ensure that they are Covid free.

By using the **Kovid killah!** procedure, everyone can

And instead of having all of the above restrictions, all a premises needs are a couple of COVID KILLAH operatives/nurses spraying everyone entering and leaving the premises.

No masks, no screens, no social distancing.

You could even open their borders by applying the H2O2 nebulising treatment to anyone and everyone entering on every route.

A simple 30 second procedure which makes everyone safe.

But surely this must be illegal and kept secret BIKOZ BIG PHARMA, BIG MED AND BIG BILL GATES ain't gonna make no money saving our Planet.

All these oppportunistic producers are making a fortune selling sterilising handwash (like they use in the operating theatres - so it must work, right?)

But hey - isn't that from where MRSA (the flesh-eating, antibiotic-resistant superbug) emanates?

If this handwash works how come it doesn't kill MRSA

This is not a question as I shall tell you why

BIKOZ it only kills 99.99% of **all known bacteria**

It doesn't even kill 100% of known bacteria

I've seen the accumulative results of using 99.99% effective disinfectant.

In my rental apartment these two dirty dogs of tenants were using Dettol. The place stank, worse than a garbage dump. I asked what they were using, They showed me Dettol I told them to use bleach.

They did.

The next time I entered, the offensive smell had gone and the place smelt clean.

What do you think that tells you about 'disinfectant' that only kills 99.99% of all known germs?????

Only two solutions kill ALL BACTERIA, known and unknown, in miniscule concentrations

0.5% solution of common household bleach (50ml in 1L)

0.5% solution of HyDrogen peroxide (H2O2)

Bleach is much more stable and much cheaper

Both these kill ALL BACTERIA **KNOWN AND UNKNOWN IN 60 SECONDS** so does ethyl alcohol but it is too expensive and dangerous and makes people blind who drink it.

And, according to a restaurant owning acquaintance, both bleach and H2O2 have been banned, thereby creating yet another MRSA clone, flesh eating, antibiotic resistant, monster bacteria.

But then opportunistic covid product hustlers would fall by the wayside and probably never vote for you again.

Yet another dilemma.

(The ever-populist former presidente of my local council here was lobbied to reduce the heights of the newly installed speed bumps on the street passing the local kindergarten, because the plutocats couldn't drive at their chosen speed - otherwise they wouldn't vote for him next time.)

Hey! Democracy at work, yet again. However, I digress.

Just how obvious are they all gonna look when the proverbial shit and denials hit the fan and the population insurrects?

The bottom line here is the prospect of a bunch of Chinese/russian /youthessofhay vulture capitalists buying your parliament for less than one cent on the euro.

You don't believe me?

You are old enough to be able to read the runes without assistance.

Or do you think your parliament will continue this conspiratorial, Covid charade so that all your rich and privileged chums become more rich and privileged?

I've written to various prime ministers and newspapers offering my services, prepared to go where their cowardly doctors (and editors) wouldn't. Their silent responses have been overwhelming.

It would appear that the financially induced, alimentary tract inserted, solid gold, corporate elbows appear to have been collectively inserted and doing a marvelous job.

The bottom line being; live in fear now then collect your pay-off later (Jam tomorrow - maybe)

Well you are the ones who have to live with yourselves.

It would restore a lot of the country's belief in democracy for you and your team to do the right thing by your voting, working, tax paying public and their dependants

you got the tools to keep you stay informed and safe - so use them to the best of your abilities

All the best in these, 'enlightened' times

louis lescrooge

p.s. sign up to emails from www.mercola.com

The good doc always came across as a thin-skinned, hard-sell charlatan with expensive remedies.

However this covid conspiracy has seen him come good.
