

Dear Mr Whitty,

You don't look like the kind of IC prof who would rewrite research to be in line with his beliefs/ideas/dreams, because I know of one who did in the late 1960s, but appearances can be so deceptive.
Let's hope not.

This is not a hate letter (of which you are probably being inundated by irate UK dwellers)
However this might not make for comfortable reading.

Either, you are already aware of what I have attached, or you are not.
Should you already be aware, then that would make you a complicit big player in, what is fast transitioning into, the COvid CONspiracy.
Let's hope not.

Take a mo' to consider your UK covid containment strategy and the ROW's strategies.

Ask yourself, honestly, are they working?

You could say they are; as expected, worse than, or better than.

But that would be dodging the reality.

The reality is that there is, in the attachments, a home cure that will kill covid in less than 60minutes.

It is described in great detail in three of the links in the pdf Covid Killer v2! by three USof Hay doctors, a couple of whom have been using it for **TWENTY FIVE YEARS+**, but the CDC have threatened one with licence removal, because, according to them, there can be no cure - until they say there is.

And its all down to Big Pharma and Big Bill Gates, who won't make nuffink out of it if the ROW knows that it works and costs pennies.

That is bad for them but good for the ROW.

I'll cut to the chase.

So what is it going to be?

Are you gonna be the saviour of humanity and blow the whistle on these greedy grafters, or are you gonna be the chicken with the financially induced, alimentary inserted, solid gold, corporate elbow?

Just remember - if you don't blow the whistle, someone else just might, and that might make you look less than the man, you, or your colleagues, thought you were.

I'm assuming that your colleagues hold you in some high regard, but I could be wrong.

If they think you're a schmuck. then go for the elbow.

N.B. The longer this goes on, the smellier this conspiracy virus gets.
The powers that think they be can't hold the lid on it forever.

Thanks for your time and feel free to contact me for further clarity.

All the best

Louis lesCrooge

P.S.

The following is a post I have sent to heads of states, who I erroneously believed to be not part of the golden elbows club. How wrong can one be? They all appear to be part of the conspiracy.

post sent to

Apos for earlier!

*Ignore the prisonplanet/ alex jones references.
It's been 10-15 years, at least. since I checked it out.*

*Today, Jones is an ultra-right wing, gun supporter for juveniles, and a Trump loving maniac with weight problems along with ensuing diabetes.
OR he is parodying the GOP for the benefit of hip Democrats.*

We'll probably never know.

Anyhoo, with a little bit of ill health, or an unseemly blast of Conspiracy virus - he won't be around for long.

Dear Madame Presidente

Boy, is your EU in a mess so - LISTEN UP!

However, before I commence berating your pandemic mismanagement, first I must commend you on your transparent accessibility.

If only other presidentes/ prime ministers were so acessible.

As you might imagine from my comments so far I am of the confirmed opinion that there are enough well-placed persons who are party to this conspiracy virus and want to keep it that way.

So, either you are part of the select group of recipients of the financially induced, alimentary tract implanted, solid gold, corporate elbow, or you are not.

You are busy dealing with Bobo the UK clown. so I'll be as brief as I can.

I am not sure you have any real idea what this covid conspiracy is doing to your EU population.

Apart from killing them, your 'control' methods are debillitating businesses, isolating families, in fact doing as good a job as ICE is doing on the Mexican border.

Remember the movie TOTAL RECALL - if not then watch it.

And check out the <https://www.prisonplanet.com/> and <http://tv.infowars.com/> websites.

It is run by a motormouthed maniac by the name of Alex Jones.

A lot of what he claims is either the truth, or close to it.

But he is also a maniac.

It might be disconcerting for you to see all your countries leaders having no idea what they are doing to control an out-of-control monster pandemic, or it might not.

It's not all their fault.

They are being misguided by self-interested forces in the guise of the CDC and the WHO, both of which are the glove puppets of Big PHARM, BIG MED & 'PHYLANTHROPIC' BIG BILL GATES

I have been tracking 'fake nooz' - the stuff that the donald and his gang of liars and thieves don't want people thinking about, or even knowing.

Please study the links thoroughly as well as the attachments.

you will learn a lot about surviving this conspiracy virus, keeping your countries open and their economies functioning if you pay attention and forget what disinformation the CDC and WHO are filling your heads with.

In one of the links you will hear testimony from Dr Brownstein, in which he is threatened with having his med licence revoked by the CDC if he does not withdraw his claims that his treatment can cure/stop/kill covid.

Because the CDC know there is no cure - confident they are not.

Funny old country the youessofhay - land of the free - I believe they claim.

I have also condensed the H202 treatment into to a simple, step-by-step procedure for the non-medically trained/ hygene unaware.

It is entitled Kovid killah!

How does that old saw go?

*Cometh the hour, cometh the man
or perhaps in your case it might be the reverse*

So ask yourself if are you part of the old establishment line of maleable incompetents, liars and crooks masquerading as political saviours, the like of which I have observed for all of my fifty years of political awareness.

or are you indeed a watershed person with balls enough to do the right thing by your people and make The Bobo and The Donald look like the pathetic, lying clowns they don't need to aspire to be?

And if you are the latter are you going to explain to the business/retail/services world that it is not incumbent upon them to ensure the safety of those working or entering their premises, by them having to shell out for disinfectant, handwash, safety curtains, social distancing enforcers then limiting access to their premises.

This isn't Russia or China or even the youessofhay!

Instead it is incumbent on everyone to ensure that they are Covid free.

By using the COVID KILLAH procedure everyone can

And instead of having all of the above restrictions, all a premises needs are a couple of COVID KILLAH operatives spraying everyone entering and leaving the premises.

No masks, no screens, no social distancing.

You could even open your borders by applying the H2O2 nebulising treatment to anyone and everone entering on every route.

A simple 30 second procedure which makes everyone safe.

But surely this must be illegal and kept secret BIKOZ BIG PHARMA, BIG MED AND BIG BILL GATES ain't gonna make no money on it.

In addition to this, all these producers making a fortune selling sterile handwash (like they use in the operating theatres - so it must work, right?) But hey - isn't that from where MRSA (the flesh-eating, antibiotic-resistant superbug) emanates?

If this handwash works how come it doesn't kill MRSA?

This is not a question you need to answer, as I shall tell you why.

*BIKOZ it only kills 99.99% of **all known bacteria***

It doesn't even kill 100% of known bacteria

Only two solutions kill ALL BACTERIA, known and unknown, in miniscule concentrations

0.5% solution of common household bleach

0.5% solution of HyDrogen peroxide

Bleach is much more stable and much cheaper

Both these kill ALL BACTERIA **KNOWN AND UNKNOWN IN 60 SECONDS**

so does ethyl alcohol but it is too expensive and dangerous and makes people blind who drink it.

*However, I was advised by a restaurant owning friend this week, that the use of bleach and H2O2 **were prohibited.***

Funny old world, is it not?

Then opportunistic, covid product hustlers would fall by the wayside and possibly never vote for you.

Yet another dilemma. What to do?

(The ever-populist former presidente of my local council here was lobbied to reduce the heights of the speed bumps on the street passing the local kindergarten, because the plutocrats couldn't drive at their chosen speed - otherwise they wouldn't vote for him next time.)

Hey! Democracy at work, yet again. However, I digress.

Or will you continue this conspiratorial, Covid charade so that all your rich and privileged chums become even more rich and privileged?

Don't tell me. I do not want to be privy to your innermost dilemmas. What to do, indeed?

I've written to various prime ministers offering my services, prepared to go where their cowardly doctors wouldn't.

Their silent responses have been overwhelming.

It would appear that the financially induced, alimentary tract inserted, solid gold corporate elbows appear to have been collectively inserted and doing a marvelous job.

The bottom line being; live in fear now then collect their pay-off later (Jam tomorrow - maybe)

Well you and they are the ones who have to live with yourselves.

It would restore a lot of confidence in democracy for you to do the right thing by your tax-paying public and their dependants.

The real bottom line here is the prospect of a bunch of Chinese/russian /youhessofhay vulture capitalists buying your parliament for one cent on the euro, or even less.

You don't believe me? This is a dangerous game of chicken in which you are all participating.

You are old enough to be able to read the runes.

Anyhoo, get in touch if you want more.

you got the tools to allow your people to stay informed and safe - so use them to the limit of your abilities

All the best

p.s. sign up to emails from www.mercola.com

The good doc always came across as a thin-skinned, hard-sell charlatan with expensive remedies.

However this covid crisis has seen him come good.

I received a dismissive, yet authoritative reply from a fully activated, golden elbow recipient, who chose to ignore the peer reviewed evidence in favour of his own.

It is marked EU Health office Reply (2020).pdf - fascinating dismissive guff - just where do they learn to write that stuff? (don't bother telling me)
